

# Kitchen Planner

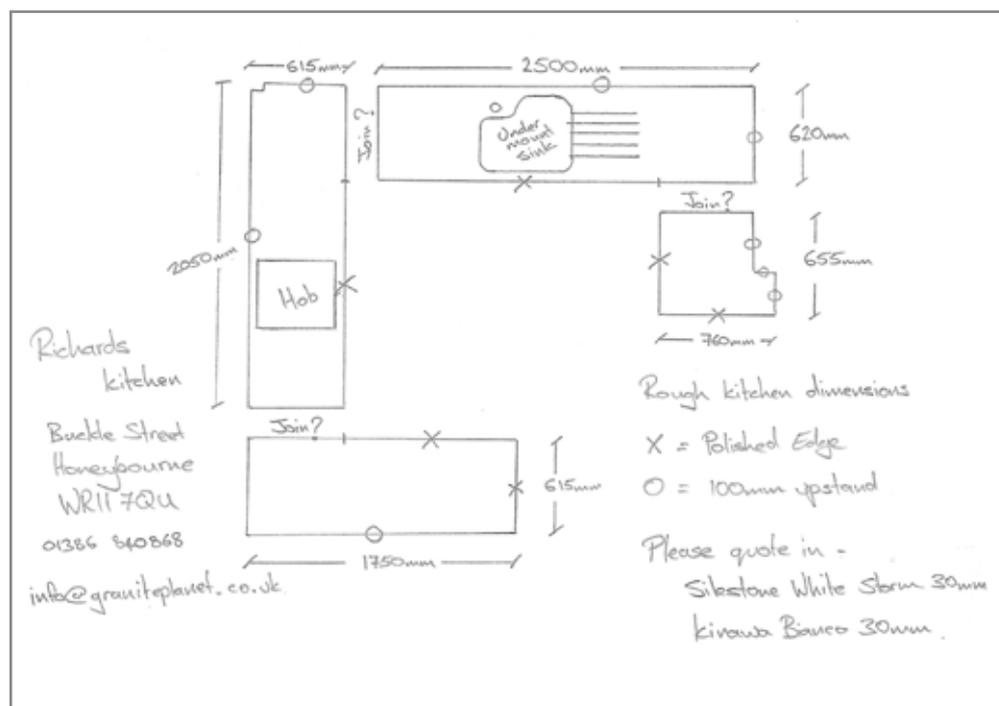

## Sketch your kitchen

If you intend to purchase your worktops independently and you already have a plan from a designer or a manufacturer you can send a copy, scan or photograph of the plan to us via [email](#) or post.

If you don't have one yet, you can just send us a simple sketch like the one below. We've provided some handy grid paper on the next page to help you out.

Your kitchen plan or sketch needs to include external dimensions, the depth of proposed tops, the kind of sink you've chosen and the type of cooker. The drawings need only be indicative – as long as the measurements are accurate, we should be able to quote.

example sketch

If you'd like more information about any of the processes involved in getting a granite or quartz worktop installed, our frequently asked questions page on the website is a great place to start.

## Send us your plan or sketch

If you have already chosen a granite or quartz, send the sketch or plans over to us with the name of your chosen material and we will create a quote for you.

Alternatively, we can provide you with a mid value granite or quartz quote, for budget purposes that we can update when you make your material choice.
